Learning Environment Mission Statement		We Care, We are a Team, We Innovate and Improve. To treat each person individually to achieve their goals following a stroke and having the best quality of life		

LEARNING ENVIRONMENT PROFILE

General Information	The Team undertakes Stroke early supported discharge, which is a pathway of care for people transferred from an inpatient environment to a primary care setting to continue a period of rehabilitation, reablement and recuperation at a similar level of intensity and delivered by staff with the same level of expertise as they would have received in the inpatient setting.
Description of Service and Client Group	The Stroke Early Supported Discharge Team has responsibility for patients at home (including residential and nursing homes) and provides: <ul style="list-style-type: none"> • Intensive, quality stroke care and rehabilitation that is linked to person centred goal orientated programmes, which focus on regaining and maintaining key life skills. • Continuity and consistency of care via a smooth transition from hospital to home. • To maximise patients' potential to live as independently and safely as possible; and • To provide recovery programmes that will support formal/informal carers in maintaining the patient's abilities and skills.
Description of related services & Client group	Stroke Unit
